

UI Static Mockup – Jujube Group

Main Page:

There is a navigation bar at the top. This has buttons on the left side for actions like checking notifications. The right side contains a drop down menu for Sign-out, Settings, Editing Profile.

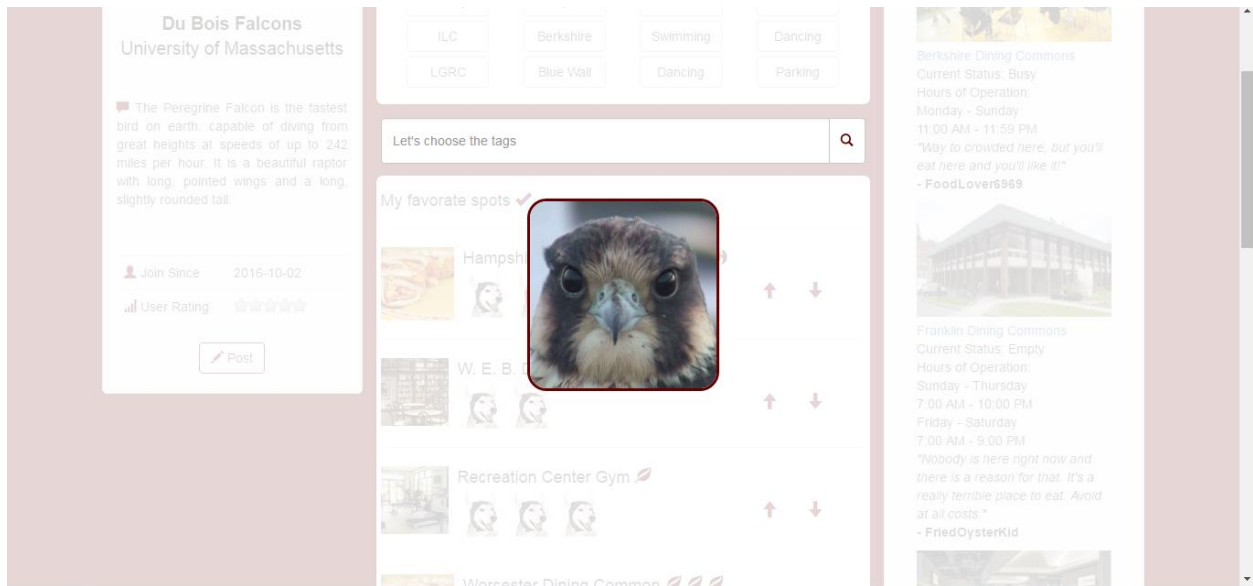

The left menu is for the currently signed-in user's profile. This contains the profile picture, name, a brief bio, date of membership, and user's rating. There is a button "Post" that prompts a pop-up Post menu (shown below). You can also click on the Profile Picture for a larger pop-up version (shown below).

The middle (main) feed contains a search function that uses tags to search. Common tags are listed and tags can also be typed into the search bar. Below that are links to the user's favorite locations and their current reports. Searching with the search bar will lead to the search results page (shown below).

The right menu at first contains "Top Spots", locations that are most popular, with their info and the most recent report for them. Selecting one of these locations will expand it in the menu (shown below).

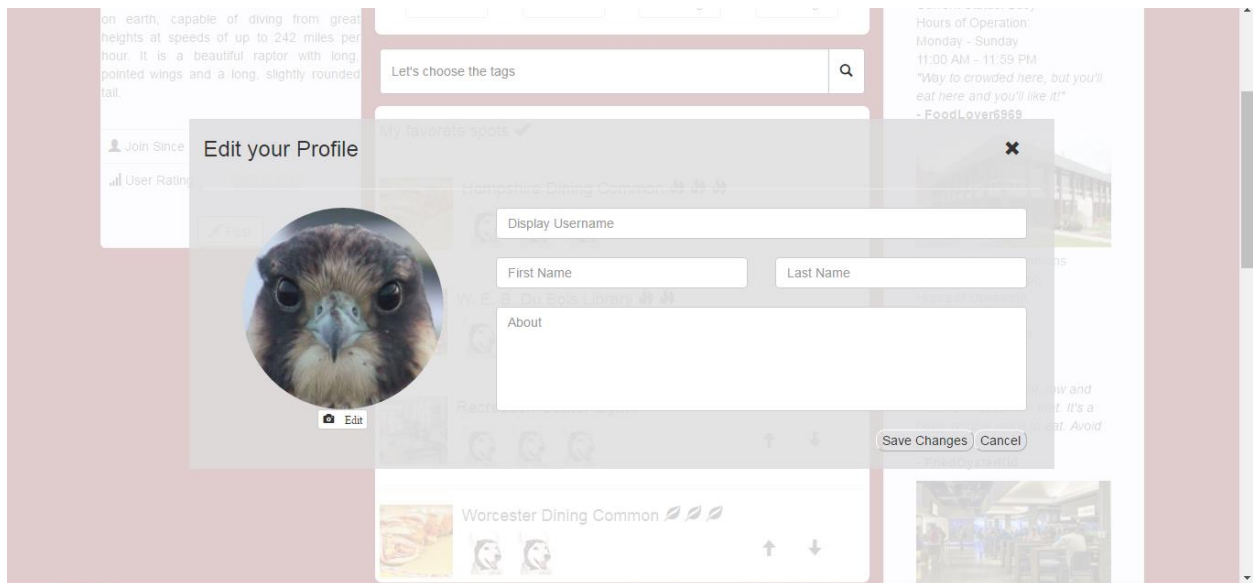

The footer has links to things like social media pages and Privacy Policy.

Profile Picture Pop-up:

This occurs when the user's profile picture is selected.

Edit Profile:

This pop-up menu is presented when "Edit Profile" is selected from the navigation bar's drop down menu. You can change basic information and edit your profile picture. Save Changes and Cancel will both close the window.

Selected Location from Right Menu:

The image shows a web application interface with a dark red background. The top section is titled "Let's check it!" and features a grid of category buttons: Study (Library, ILC, LGRC), Food (Hampshire, Berkshire, Blue Wall), Entertainment (Recreation, Swimming, Dancing), and Social (Coffee, Dancing, Parking). Below this is a search bar labeled "Let's choose the tags" with a magnifying glass icon.

On the left, a user profile for "Du Bois Falcons" at the "University of Massachusetts" is displayed, featuring a falcon image, a description, join date (2016-10-02), and a post button.

The right sidebar shows the "Berkshire Dining Commons" location. It includes a photo of the dining area, current status (Busy), hours of operation (Monday - Sunday, 11:00 AM - 11:59 PM), and a quote: "Way to crowded here, but you'll eat here and you'll like it!" by FoodLover6969. Below this is a "Top User Posts" section with three entries: FoodLover6969 (25 votes), RickJames (11 votes), and FrankReynolds (6 votes).

The main content area, titled "My favorite spots", lists two locations: "Hampshire Dining Common" (3 dog icons, 11 votes) and "W. E. B. Du Bois Library" (2 dog icons, 11 votes). Each entry has up and down vote arrows.

Below the main content, a detailed view of the "Berkshire Dining Commons" location is shown. It features two user reports: "RickJames - It's straight poppin here. Huge crowds but ya shud come" (11 votes) and "FrankReynolds - It was pretty busy there but at least I didn't get robbed" (6 votes). A "View More" link is at the bottom.

Berkshire Dining Commons was selected on the right menu and it changes to this. This keeps the location's information and displays the three most recent reports. The reports can be voted on and the user's profiles can be viewed when clicked (shown below). You can also select to "View More".

Search results:

The screenshot shows a web application interface with a dark red header. The navigation bar includes 'WebApp', 'Home', 'Moments', 'Notifications', and 'Messages'. A search bar on the right contains the text 'UMass dining'. Below the header, the main content area is divided into three columns. The left column features a profile for 'Du Bois Falcons University of Massachusetts' with a falcon image, a bio about the peregrine falcon, and a 'Post' button. The middle column displays search results for 'UMass dining', showing four dining commons: Berkshire, Worcester, Franklin, and Hampshire. Each result includes a placeholder image, the name, and a brief description. The right column shows 'Top Spots' with images and details for Berkshire and Franklin Dining Commons, including their current status and hours of operation.

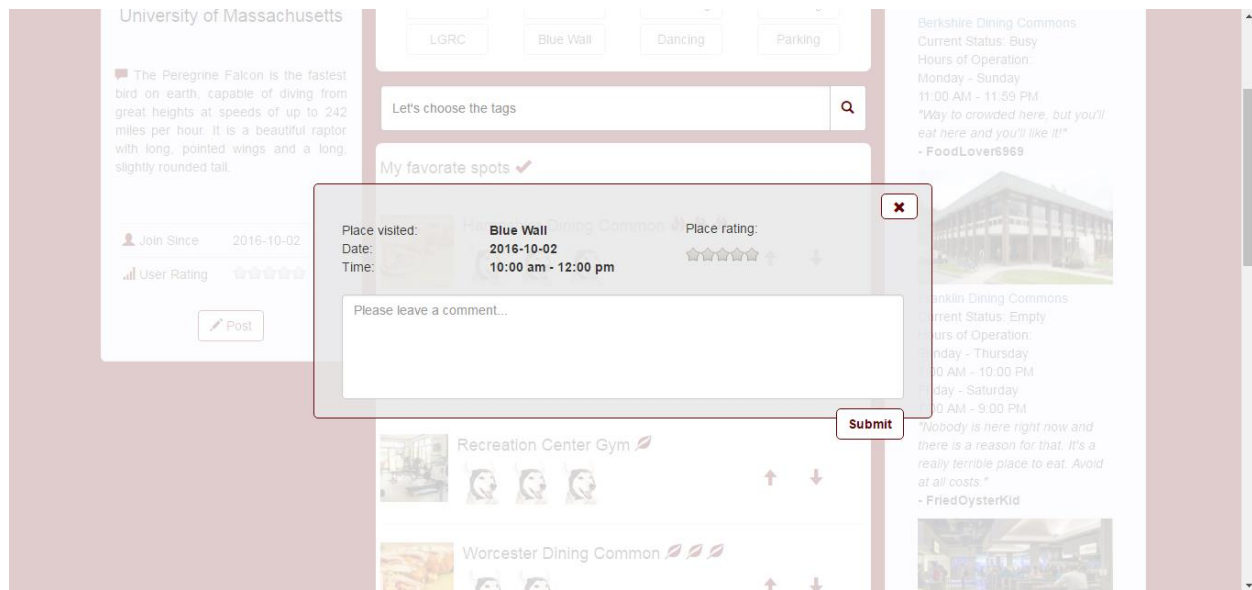

This page results when a search is done in the search module on the Main Page. Results display with name, image, and information. Selecting a location will bring you to its page.

Other User's Profile:

The screenshot shows a user profile pop-up for 'Frank Reynolds'. The pop-up is overlaid on a background of search results. The profile includes a profile picture of a man in a yellow shirt, a bio about the peregrine falcon, and a 'Post' button. Below the bio, there are fields for 'Join Since' (2016-10-02), 'User Rating' (5 stars), and 'Favorite' (Berkshire DC). A 'Report' button is located at the bottom right of the pop-up. The background shows search results for 'UMass dining' and a 'Top User Posts' section with posts from 'FoodLover6969', 'RickJames', and 'FrankReynolds'.

This pop-up occurs when you select the username of another user. This has all of their information and an opportunity to report them for inappropriate behavior on the application.

Post pop-up:

This is prompted by the “Post” button in a User’s Profile on the Left Side Menu. Here the user can enter a rating for the location they are at and a comment. Submit will post this to the location’s feed.

Group contribution

Michael White: Other user’s profile pop-up in userProfileClicked.html and userProfileClicked.css and Written Report.

Andrew Murchinson: Right side menu with “Top Spots” and the updated right side menu with reports when a location is selected (previewUserPosts.html/.css).

Mi Li: Left side menu including profile picture with pop-up ability, Post pop-up menu that results from pressing “Post”, and a working Submit button on the Post pop-up menu (btnPostClickedPage.html/.css, btnSubmitClickedPage.html/.css, and userPicClickedPage.html/.css).

Chia-Lei Lee: Edit profile pop-up (editProfileScreen.html/.css) and drop down menu in navigation bar.

Shiyan Yin: The navigation bar, the footer, and Main Feed (Formatted search module in feed and created My Favorite Spots feed)

Hoang Nguyen: Search module seen on main feed (searchmodule.html/.css) and Search Results page (searchresult.html/.css).
